

## ABBA-5 -ANTI-BULLET BODY ARMOR

**VF-980-1-FP** Includes Front Ceramic Plate (25cm x 30cm)

**VF-980-1-FRP** Includes Front & Rear Ceramic Plates (25cm x 30cm)

This armored vest was designed to protect the media reporter when on location in high-risk situations. Optimal weight distribution and flexibility allow free movement without compromising maximum protection. The ABBA-5 offers protection against shrapnel & knives, as well as pistol, sub-machine gun, and in the areas of the Ceramic Plates it also provides protection against high-velocity bullets. Unlike other anti-bullet vests, KATA's Body Armor offers protection for the sides of the torso as well as chest and back.

**PROTECTION** - Front, Back, Sides, Neck - "soft ballistic" : protection against 9mm FMJ Bullet, 124 Grain, 430-440 m/s, Ceramic plates area only – protection against 7.62 X 39AP and 5.56 x 45 M193 Ball in conjunction with "soft ballistic".

- Maximum protective area
- Detachable wrap for laundry purposes
- Soft/hard ballistic panels wrapped in water and light proof covers

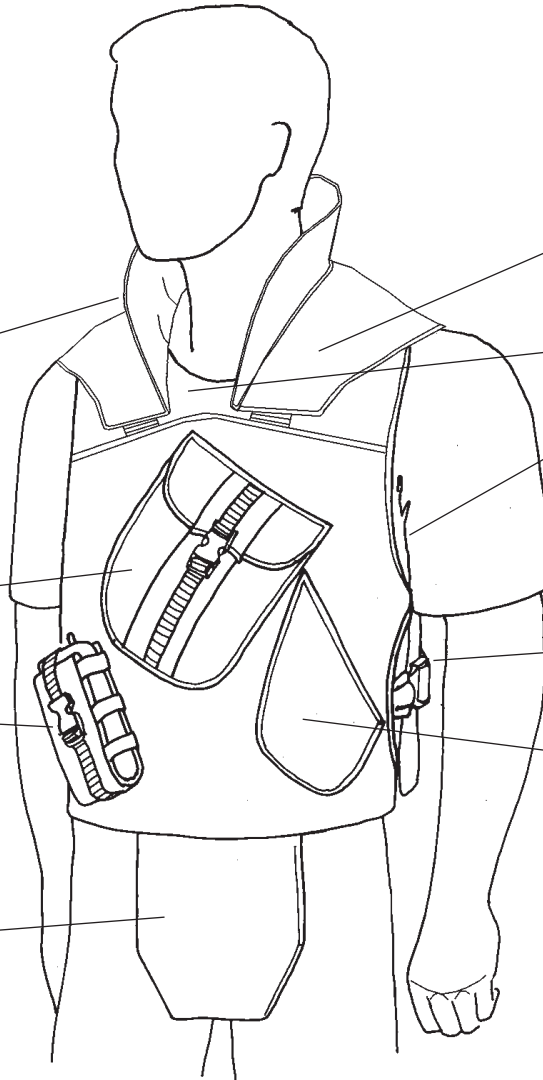

Neck protection (optional)

Multi-use pocket (suits Video cassette)

Pouch for cell phone, etc.

### GROIN PROTECTOR MD-703-1

OPTIONAL-Groin protection (can be removed or stow in the inner pocket) works without limiting movement.

Adjustable shoulder straps and waist belt for best personal comfort

Comfortable cut for maximum mobility

Reflective tag on back identifies wearer as member of the press; can be attached or removed by hook & loop fasteners.

**PRESS** 2.75" x 11"  
7cm x 28cm

Complete protection of body sides, covering weak points that are usually unprotected in the majority of other protective vests

Slash pockets

120203
